

Leaving East Keester

The disembodied glass eye stares coldly at Mark Fields, as he tries to appeal his draft induction in 1967surely a Vietnam death notice. Smart enough to see the flaws in the system prior to his hilarious Appeals Board hearing, Mark circumvents the dreaded Army ineptitude and enlists in the Air Forcelessening his chance of coming home in a body bag. As LEAVING EAST KEESTER opens Mark and his wife Lisa, upper middle class white kids, struggle to first avoid and then maximize his required military service. Follow their bizarre twists on what might have been an ordinary story as Mark experiences basic training, officer training and assignments blessedly free from war zones, but certainly no walks in the woods, especially since trees dont grow in most of their storys venues. The author wishes to make it perfectly clear that any resemblance of the characters in this book to anyone living or dead is purely coincidental, and has nothing to do with the authors reputation for making a huge pain in the butt of himself. However, mention is made of former president of the United States of America, Richard M. Nixon, who may have been real. This, of course, is in direct conflict with what many members of his Cabinet have been purported to say, and I quote, Mr. President, are you for real?
