

The Principles and Practice of Medical Jurisprudence / By Alfred Swaine Taylor, Vol. 1 (Classic Reprint)

In preparing this work for a second Edition, it has been found necessary to divide it into two volumes. Every page has undergone revision, and such alterations and additions have been made as the progress of time had rendered necessary. A slight change has been made in the arrangement of the subjects, and this has been accompanied by an increase in the number of the chapters from eighty-seven to one hundred. Some cases of old date have been omitted, and replaced by others of more recent occurrence and of more immediate interest. The subject of Medical Evidence has been enlarged, and incorporated in two chapters with the text of the work. In the section on Poisoning, in addition to recent cases and improved Processes of analysis, notices of several new Poisons have been introduced. In the section on Wounds and Personal Injuries, many new cases of medico-legal importance will be found, and there have been considerable additions to the chapters on Wounds of the Throat and Chest, on Blood-stains, and the new methods of research proposed for the detection of blood, including Spectral analysis and the Guaiacum process. The subject of Cicatrices and other marks indicative of personal identity has acquired great medico-legal interest in reference to the Tichborne Case. The evidence derivable from these marks will be found in the chapter appropriated to this subject; but as the case is still pending, it is impossible to give a summary of the medical evidence or to make any comments upon it. (Typographical errors above are due to OCR software and do not occur in the book.)
