

## Cadet

The two Cadet books by Commander James Bondage compiled into one novel: Humiliation and pain was part of every days training for the young women selected to be Officer Cadets at the Armys newest Academy. In an army where, until now, only the men had ever been made officers, Private Robin Bransom was delighted to be informed that a special training program had been set up to produce the first female officers, and she was one of those selected. She, and the other young women, were to be trained as aides to the senior officers, and to her horror she discovers that their duties will include providing sexual services of whatever variety the officer might prefer. As most of the senior officers seemed to prefer the girls to be dominated and in pain, the training, naturally, concentrated on domination by the instructors and total submission by the cadets. Worse, not one of the cadets is able to tell anyone anything about it, and, worse still, Robins younger sister is determined to join the army and to apply for officer training
