

Children of The Black Sun

Is the Western World ruled by Nazi's? Did the German Nazi party lose the battle but win the War? Germany is on the brink of defeat in WWII. The Russian armies are heading towards Berlin where the Nazis face the prospect of their dreams of a master race being totally crushed. Or do they? Using prisoners in the concentration camps, their eugenics and IVF programmes have been brought to a successful conclusion and can now breed offspring of the leading Nazis, including Hitler. Does Hitler commit suicide or does he escape to remain the head of a Nazi resurgence in the USA and Europe through leading politicians, bankers, industrialists and security networks using an IVF breeding programme outside Germany?. Only modern DNA analysis can uncover the truth. Tom Fisher, a leading DNA research scientist, is recruited by Mossad. Can his work be used to uncover the truth and identify the modern descendants of the German Nazis? Are they, as suspected, now among leaders of the West? Faced with a formidable network of influence, security services, power and money is it possible, can anything be done, or have undemocratic, fascist leaning dictatorships, the master race and New World Order, taken control ?
