

# CODEWORD: SILENT VOODOO

In the mid-1990s, a senior Russian official claimed that perhaps hundreds of miniaturized nuclear weapons developed by the Former Soviet Union, so-called suitcase nukes, appeared to have gone missing. Although no information was ever produced to substantiate the claim it remains a mystery why the allegation was made, or if it was true. What if such an incident were to occur today, the weapons falling into the hands of terrorists? What would it be like to be at the epicenter of hunting them down? John Eccles, a part-time consultant for the CIA knows all too well. Along with seasoned operative Jane Peabody (if that is her real name), they find themselves desperately trying to outthink an Al-Qaeda mastermind racing to destroy western capitals. This fictional account was reviewed and approved for public release by the Office of the Director of National Intelligence and the Central Intelligence Agency. The resemblance of any events or characters contained herein to those in the real world is purely coincidental.
