

Confessions of an Email Spy

Mark Stone's debut novel is a gritty fun read. A techno-thriller that offers a sobering insiders view of just how vulnerable our words are in cyberspace. --Daniel Kalla, best-selling author of *Pandemic*, *Blood Lies*, *Cold Plague* and *Rage Therapy*. Computer security specialist Jonathan Davis works for a large financial services company in Palm Springs, California. The job is mind-numbing until he begins spying on the emails of his fellow employees. It isn't long before Davis comes upon a scandalous e-mail from one of Hollywood's hottest stars. A recovering gambling addict swimming in debt, Davis believes his prayers are answered when he sells the star's e-mail to a gossip magazine for a hefty sum. With his debts paid off, he intends to put the indiscretion behind him--but the magazine wants more and will go to any lengths to get it. As if that isn't enough to keep him up at night, Davis becomes privy to a sinister plot to murder the very celebrity whose secrets he has been selling. With his love life in turmoil, his career in the balance, and his very life on the line, Davis must summon more than his technical expertise to save his girlfriend, her daughter, and Hollywood's elite. *Confessions of an Email Spy* is a technological thriller that will make anyone think twice before hitting Send. Before Facebook... Email was much more scandalous.
