

Cosmopolitan Spaces: Europe, Globalization, Theory (Routledge Advances in Sociology)

Cosmopolitan Spaces: Europe, Globalization, Theory endeavors a highly innovative reading of both globalization theory and contemporary European transformations. Interpreting cosmopolitanism as a politics of space, Rumford positions his analysis at the intersection of two exciting currents in contemporary social science research: the spatial turn in the social sciences and the renewed interest in cosmopolitanism. Rumford elaborates a completely new theoretical framework for understanding the contemporary social and political transformation of Europe, and takes issue with many aspects of the globalization-inspired accounts of Europeanization which remain blind to the spatial dimensions of change. In addition to its compelling reading of cosmopolitanism, *Cosmopolitan Spaces: Europe, Globalization, Theory* offers a provocative critique for thinking about Europe in terms of Empire, and advances the startling claim that Europe should be considered postwestern.
