

European Private International Law

Usable both as a student textbook and as a general introduction for legal professionals, European Private International Law is designed to reflect the reality of legal practice throughout the EU. The private international law of the Member States is increasingly regulated by the EU, making private international law ever less national and ever more EU based. Consequently, EU law in this area has penetrated national law to a very high degree, making it an essential area of study and an area of increasing importance to practising lawyers throughout the EU. This book provides a thorough overview of core European PIL, including the Brussels I, Rome I and Rome II Regulations (jurisdiction, applicable law for contracts and tort), while additional chapters deal with PIL and insolvency, freedom of establishment and corporate social responsibility.
