

Frozen (The Frozen Trilogy) (Volume 1)

All of their faces were turned up in pain, but nobody said anything. Back up at the peak of the mountain, Julia had her nose turned up in a snarl, and Praters face was full of contempt before he said, If you do not submit, I will see you all dead before I allow you to destroy my plans. He stared directly at me before I could even think the ground shook. I looked sharply at Caleb When Tarryn Jenner left her home behind, she thought the bustling life of NYC was just what she needed. She hoped the change in scenery would help keep her mind off the death of her father. But after a few months there, death is all she can focus on. Alone in New York City, Tarryn is on the brink of losing her sanity. With the possibility of being the last person in the world, she hides away in her apartment from the tragedy that has befallen outside. Only after venturing into the hot July sun for supplies, and saving a boy named Tyler, does Tarryn realize there is more than what meets the eye. They set out to unravel the mystery and why the bodies that appear dead arent decaying. Embarking on a journey that tests them mentally, as well as physically, they search for clues and some remnants of society. Along with a man named Carter and some survivors, they come head-to-head with a political leader harboring volatile secrets. Together, they fight a program that is holding citizens of the world hostage and race against the clock. Determined to save those who are frozen before society crumbles in front of their eyes.
