

New High Ground : Strategies and Weapons of Space-age War

THE NEW HIGH GROUND takes us to the new arena of military operations - space. Thomas Karas introduces us to scores of the most powerful and influential men in the space establishment - the military, NASA, the aerospace industry. They think the time has come to treat space as a medium for research and development. already fulfilling these plans are dozens of space satellites that provide the Pentagon with instant communication to ships, places, and bases around the globe; detailed pictures in visible and infrared light of the most secret Soviet military installations; navigational satellites that tell a pilot the exact altitude and location of his aircraft to within fifty feet. Karas shows us the mechanical, political, economic, and military inner workings of the newest technology.
