This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1920 edition. Excerpt: ... V Becket And The Law¹ In a former paper² I spoke of the contest between Henry II and Becket from the point of view of sovereignty; in this paper I speak of it from the point of view of law and morals. The question will still be one of the collective mind against self-centred individualism, but the focus will be shifted to morals, to collectivism founded on law in morality; at the same time steering clear of all speculative questions. Undisciplined individualism may flourish under conditions of order or of disorder; with this difference, that it is less objectionable in the latter than in the former case, since it has the excuse of necessity. That was true in the disorder of Stephens reign; every one had to look out for himself if anything was to be saved from the ruin. This was true of churchmen as well as laymen. Was it to result in a general eclipse of morals, making sordid interests with all men an end in life; was individualism to become master where it should be servant; was this to be true in the councils of the Church as well as among the gentry and the less instructed masses? The records of crime were growing ominous; churchmen were becoming too often an example of a lost ideal. Can an archdeacon be saved? sighed John of Salisbury.¹ Was individualism of the sordid kind to fix its hold upon Englishmen and leave them in hopeless inability to unite? Opportunity, with the man for it, was to appear, an opportunity to be seized or lost, once for all. ¹ I have throughout this paper referred to Giles Life and Letters of Becket, and to Huttons St. Thomas of Canterbury, because the passages quoted or cited are given by them in translation.
