

State Responses to International Law (Routledge Advances in International Relations and Global Politics)

Do countries keep their promises to the international community? When they sign treaties or learn about new expectations, do they take them seriously and implement them? Since we already know intuitively that not all countries do, the next question and the topic of this book is: who complies? By considering a wide range of different rules each precise enough to allow one to measure state compliance and a variety of methods, we hope to answer this question once and for all. Including a systematic analysis of 8 different countries selected for the variety of regime type, international engagement and economic development they represent, the work caps a five-year research program and represents the culmination of twenty years worth of work in the disciplines of international relations and international law on legalization and compliance. Stiles highlights the importance of systematic study of compliance in order to move further towards solving truly global issues, such as terrorism, human trafficking, air pollution and collective goods provision. With international laws generally designed to improve the human condition and current levels of compliance inconsistent at best, it is vital to gain a better understanding of who complies and why. This detailed study will be of interest to students of Politics, International Law and International Relations.
