

## THE PERCEPTION OF REALITY -- the complete novelette

A scientist, working on a way to travel through time, accidentally alters his standing with the universe, making him able to travel to any number of alternate realities. This phenomenon, as he calls it, makes it possible to see all of his future decisions, and then choose which decision he will make, so that he can avoid any major missteps. At first he uses the phenomenon on mundane tasks like showering or brushing his teeth (with unexpected results!), but later he goes on a joy ride with his neighbor, robs a liquor store, and even finds the confidence to date the girl of his dreams. All the while he is able to stop, back up, and try again, the events that may not go quite the way he would have liked. In the end, however, he comes face to face with a figure of his own recklessness. What does he do? What will happen? Find out inside...THE PERCEPTION OF REALITY!
