

The Boetie Legacy, and a World in Peril

In *The Boetie Legacy, and a World in Peril*, Luke Canton arrives in Granada, Nicaragua, midlife and dreading having to start over again. Spending the last twelve years as a student has taken a toll on his relationships, and he yearns to settle down. But he knows he has to let the people know what he uncovered that while humanity has been duped into accepting perpetual war, we now have the ways to expose, sanction, and control the powers that have done so. Somehow the ideas forming in his mind the way for humanity to claim and enforce its inherent right to direct our governments and corporations have to be brought to life. And if a more compassionate world is possible, Luke has to do his part regardless the cost; for him, life is that way. He has come too far, sacrificed too many people and too much of life, not to see this journey through. But now he's struggling, wondering if he's reached his limit or if he's as naive as many people seem to think. At least he is until he meets Jo. She brings clarity and stirs up urges he had put aside long ago. Could there really be someone for him at this point in his journey? Someone who could walk by his side as they wove their unique selves into the fabric of creation? But old fears loom large, testing his courage to love again and threatening humanity's chance for survival.
