

The Carbon

Its three hundred years since the Cataclysm devastated the solar system. A new Ice Age covers the Earth, and the wastelands contain slavers, monstrous creatures and worse. As the survivors attempt to rebuild, there is no room for a girl who wont obey the rules. Fleeing for her life with only a monkey for company after she is caught seducing the priests daughter, Daphne searches for a place that will accept her for who she is. Perhaps she will find it under the ice. If The Carbon doesnt get her. A 9,500 word story of lesbians, monkeys and global cooling.
