

The Storm Girl

The Storm Girl is a short story (11,037 words), set in the year 882 AD. It starts with a brief overview of life in early medieval England, and continues with the story of Annis and Garrick, a couple who have longed for a child, but who after 28 years of marriage have slowly accepted that this will never happen. One night a terrific storm rages in the bay, a storm much fiercer than anyone can remember. Early the next morning the couple walk down to the nearby beach where Annis discovers an abandoned, newborn baby. They take the baby home and raise her as their own. But where did she come from, and where is the mysterious place that beckons her return? Certainly not the immediate area, no one has raven hair, tanned skin, and cornflower blue eyes around these parts. Why have violent storms raged intermittently ever since she was found? Will The Storm Girl stay with her adopted family and Wulfric, the man she falls in love with during her teenage years, or will she return to her people, leaving everyone who loves her broken hearted? The Storm Girl has been enjoyed by teens, young adults, and adults of all ages.
