

## The United Nations in Bangladesh (Princeton Legacy Library)

This book provides the first analytic account of the United Nations relief operation in Bangladesh. Written by a United Nations staff member involved in the operation, it reflects his direct access to archives and thus offers a doubly valuable description of the inner workings of an international organization. The unusually large relief program in Bangladesh has been described as a rare example of international cooperation that has enlarged the scope of constructive United Nations action. Originally published in 1978. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These paperback editions preserve the original texts of these important books while presenting them in durable paperback editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.
